PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 4+ years of experience architecting scalable Angular and React applications. Expertise in TypeScript, RxJS, NgRx, Micro-Frontend architecture, WCAG 2.1 accessibility standards, performance optimization (lazy loading, code splitting), automated testing, and CI/CD pipelines. Proven track record delivering high-impact applications across e-Governance, fintech, and e-commerce domains

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+)

Frontend: Angular, React.js, Next.js

Web & APIs: HTML5, CSS3, RESTful APIs

Architecture: Micro-Frontend, SPA, Design Systems

UI & Styling: UX4G, Storybook, Tailwind CSS, Bootstrap, Angular Material, PrimeNG

State Management: RxJS, NgRx, Angular Signals, Redux Toolkit

Performance & Accessibility: Core Web Vitals, Lazy Loading, Code Splitting, WCAG 2.1, SSR

Testing: Jasmine, Karma, Unit Testing

DevOps & Tooling: Git, GitHub, Bitbucket, CI/CD (GitHub Actions, Jenkins), Docker, Webpack, Vite, Jira

PROFESSIONAL EXPERIENCE

- Netoyed (Grapes Telecom Pvt Ltd) – Client: NeGD (GovTech)** Noida, India
Senior Frontend Developer (SDE-II) June 2025 – Present
 - Architected **Audit360** (Angular), an automated UX audit platform integrating Lighthouse CI to evaluate performance, accessibility, SEO, security, and usability, reducing manual audit effort by **70%**.
 - Led development of the **UX4G Design System**, delivering **30+ reusable components** and utility classes, standardizing UI/UX across multiple government portals.
 - Developed comprehensive **Storybook documentation** using autodocs and structured component APIs, improving developer adoption and reducing onboarding time across teams.
 - Engineered a **WCAG 2.1-compliant accessibility widget** (contrast controls, text-to-speech, zoom), ensuring **GIGW compliance** and enhancing accessibility across government platforms.
- Antino Labs Private Limited – Client: BranchX (Fintech)** Bangalore, India
Frontend Software Developer May 2023 – April 2025
 - Built an **Admin Panel** in Angular with role-based access control (RBAC), managing platform-wide configurations, user permissions, and workflows.
 - Developed **Vendor and Merchant portals** in React.js with seamless RESTful API integration, enabling secure multi-role authentication and real-time data management.
 - Created **interactive analytics dashboards** using Chart.js and ApexCharts across all three portals, enabling data-driven business decisions.
 - Delivered features across multiple portals in Agile sprints, collaborating with cross-functional teams to ensure timely releases.
- Oodles Technologies Pvt. Ltd.** Gurugram, India
Associate Frontend Developer January 2022 – March 2023
 - Delivered **mobile-first web applications** across e-commerce and healthcare domains using Angular and React.js, maintaining Lighthouse performance scores above 85.
 - Integrated secure payment gateways (MetaMask, Stripe) via RESTful APIs, improving checkout experience.
 - Improved development velocity using Angular CLI, Material components, and Git-based workflows in Agile teams.

EDUCATION

- Meerut Institute of Engineering & Technology** Uttar Pradesh, India
B.Tech in Computer Science & Engineering 2015 – 2019
